Subject: Fwd: Verification of reimbursable expenses for monitoring Gold King mine spill

A more scientific answer is that our data shows we cannot measure any impacts at the farther reaches.

Subject: Verification of reimbursable expenses for monitoring Gold King mine spill

The Utah Division of Water Quality is preparing a work order to contract monitoring and assessment duties on the San Juan River in response to the Gold King mine spill and I've been asked to get written confirmation from EPA that these expenses will be reimbursed. Based on an initial estimate the contract will be ~ \$350,000.

Thanks,
Carl-
